## SUMMARY

A Fresh graduate Informatics Engineering student with a passion for Full Stack Development. Have been fascinated by technology, which led me to explore web development during university. Completed multiple bootcamps regarding my skills in Laravel, Vue.js, Flutter and PHP. Have high willpower to apply my knowledge in real-world scenarios and contribute to innovative tech projects. Open to opportunities in Full Stack Development, Backend Development, and Data Science.

## WORK EXPERIENCE

**Eduwork**                                                                                              **Online, ID**
*Website Developer - Internship project*                                         *Apr 2024 – August 2024*

- Contributed significantly to the development of the **Eduwork Library** website, completing 70% of the project over a 5-month period.
- Utilized **Laravel**, **Vue.js**, and **PHP** to build the website, ensuring dynamic and responsive functionalities; implemented **Vue.js** components for a seamless user interface and smooth navigation, developed the backend with **Laravel**, creating RESTful APIs and integrating with **MySQL** databases.
- Employed **Bootstrap** within **Vue.js** to ensure the website is mobile-friendly and accessible across multiple devices and screen sizes.
- Coordinated with the development team using **GitHub**, managing code updates, reviews, and collaboration across the project.
- Gained hands-on experience in frontend and backend development, focusing on best practices for security, scalability, and maintainability.

**CV Profil Indah Gypsum**                                                                  **Tangerang, ID**
*Fullstack Developer - Freelance*                                              *June 2023 – December 2023*

- Developed a company profile website for CV Profil Indah Gypsum, representing 70% of the project over a 5-month period.
- Utilized PHP as the primary technology to build and integrate the website, ensuring smooth functionality and user experience.
- Designed and implemented website features to serve as the face of the company, enhancing its online presence.
- Collaborated with stakeholders to gather requirements and feedback, ensuring the website aligns with the company's vision and branding.
- Delivered a fully operational website within the project timeline, contributing significantly to the company's digital presence.

**PT Surya Andra Jelano Jakarta, ID**                                                  **Offline, ID**
*Technician - Freelance*                                                                 *Jan 2023 - Mei 2023*

- Managed and supervised the **installation of lifts, escalators, and travelators**, ensuring proper alignment and functionality.
- Conducted essential repairs on various vertical transportation systems, diagnosing issues and performing necessary fixes to minimize downtime.
- Carried out scheduled maintenance on lifts, escalators, and travelators, ensuring operational efficiency and safety compliance.
- Supervised daily operations and ensured strict adherence to safety protocols, minimizing risks to both equipment and personnel.
- Worked closely with supervisors and the technical team to execute tasks effectively and meet project deadlines while maintaining high-quality standards.

**CV Sinergi Aneka Teknik, ID**                                      **Offline, ID**
*Technician - Freelance*                            *December 2020 - December 2022*
- Assisted with the installation of lift and escalator systems, ensuring smooth installation processes and meeting all technical specifications.
- Performed regular service checks and preventive maintenance on lift systems, ensuring all components functioned correctly and safely.
- Identified malfunctioning components, replaced faulty parts, and upgraded systems for improved performance.
- Supervised the operations of the installed systems, optimizing workflows to ensure the lift systems were running at peak efficiency.
- Coordinated with fellow technicians and supervisors to troubleshoot problems, resolve challenges, and ensure timely completion of tasks.

**PT Prismas Jamintara, ID**                                         **Offline, ID**
*Technician- Full time*                              *August 2018 - September 2019*
- Assisted in the organization and management of **lift installations**, ensuring that the process met the project specifications and timelines.
- Provided technical support for repair work on lifts, escalators, and travolators, ensuring safety and performance standards were met.
- Executed regular safety checks and maintenance services to keep the systems operational and prevent unexpected breakdowns.
- Monitored system operations, identifying potential issues and acting swiftly to prevent disruptions.
- Worked in coordination with the team, ensuring tasks were executed smoothly and safety regulations were followed.

## EDUCATION

**Pembangunan Jaya University**                           **South Tangerang ,ID**
*Bachelor Degree (S-1) - Informatic Engineering*         September 2019- November *2025*
**GPA** 2.83/4.00
- Learn and Train about Artificial Intelligence
- Created an IoT project, namely a Spider Robot with a controller
- Wrote a thesis broadly related to analyzing the best stock ranking using the Analytical Hierarchy Process (AHP) method
- Represented the university in regional programming challenges, focusing on problem-solving and algorithm development.

## CERTIFICATION & BOOTCAMP

**Eduwork**                                              **Online, Indonesia**
Laravel - Vue JS Bootcamp                                *May 2023 – February 2024*
- Mastered web development fundamentals, including HTML, CSS, and JavaScript (3 weeks).
- Developed and integrated databases using PHP, MySQL, and MongoDB (4 weeks).
- Installed and utilized Laravel and Spatie for advanced website development (5 weeks).
- Learned Vue.js to create dynamic user interfaces (7 weeks).

**LSP Universitas Pembangunan Jaya**                        **Offline, Indonesia**
Network Designer Certifications                              *September 2023*
Certificate Link (Valid until September 2026)

**Dicoding Academy**                                       **Online, Indonesia**
Software Development Certifications                       *February 2022 - June 2023*
- Starting the Fundamentals of Programming to Become a Software Developer (23 Hours)
  Certificate Link (Valid until August 2025).
- Learning the Basics of UX Design (23 Hours)
  Certificate Link (Valid until December 2025).

- Learning SOLID Programming Principles (15 Hours)
  [Certificate Link (Valid until December 2025)](#).
- Getting Started with Programming in Dart (20 Hours)
  [Certificate Link (Valid until August 2025)](#).
- Learning to Build Flutter Applications for Beginners (40 Hours)
  [Certificate Link (Valid until September 2025)](#).

## SKILLS, INTERESTS, & LANGUAGES

**Technical Skills :** | HTML | CSS | Laravel | Vue JS | Mysql | Flutter | Dart | Mechanical Electrical Macchine|

**Soft Skills :** | Communication | Collaboration | Adaption | Problem-Solved |

**Interests:** | Full Stack Developer | Front End Developer | Backend Developer | Data Scientist

**Language :** Indonesia (Native) | Javanese Language (Proficient) | English (Beginner)

## PROJECTS

**Stock+**                                                                                    **June 2024 - December 2024**
Details : Create a website to determine which stocks are the best by using the AHP method
Tools    : Laravel, PHP, MySQl
Link      : [https://github.com/Wisnuprawira/Stock-.git](https://github.com/Wisnuprawira/Stock-.git)

**POS Website**                                                                         **January 2024 - March 2024**
Details : Created a web-based Point of Sale (POS) application designed to streamline business operations with features like inventory management, sales tracking, and reporting
Tools    : Laravel, Vue JS, MySql
Link      : [https://github.com/Wisnuprawira/tugas_akhir_eduwork](https://github.com/Wisnuprawira/tugas_akhir_eduwork)

**Library**                                                                              **October 2023 - December 2023**
Details : Developed a website to manage the library at Eduwork. The library is used to store Eduwork library book data
Tools    : Laravel, PHP, MySQL
Link      : [https://github.com/ulyazen/eduwork-laravel-vue/tree/wisnu](https://github.com/ulyazen/eduwork-laravel-vue/tree/wisnu)

**Profile Indah Gypsum**                                                         **April 2023 - September 2023**
Details : Built a website for Indah Gypsum's company profile. The website is used as a website interface for Profile Indah Gypsum.
Tools    : React Native, PHP, MySQL
Link      : [https://github.com/Wisnuprawira/Company_Profile.git](https://github.com/Wisnuprawira/Company_Profile.git)

**Coffe Apps**                                                                           **January 2023 - March 2023**
Details : Developed an online coffee ordering application that allows users to customize their orders, participate in loyalty programs, and receive real-time notifications.
Tools    : Flutter, PHP
Link      : [https://github.com/Wisnuprawira/apps_coffe](https://github.com/Wisnuprawira/apps_coffe)

**Marketplace** (PHP)                                                            **January 2023 - February 2023**
Details : The application enables users to browse products, manage carts, and complete purchases through a straightforward interface, delivering a smooth online shopping experience.
Tools    : PHP, Mysql
